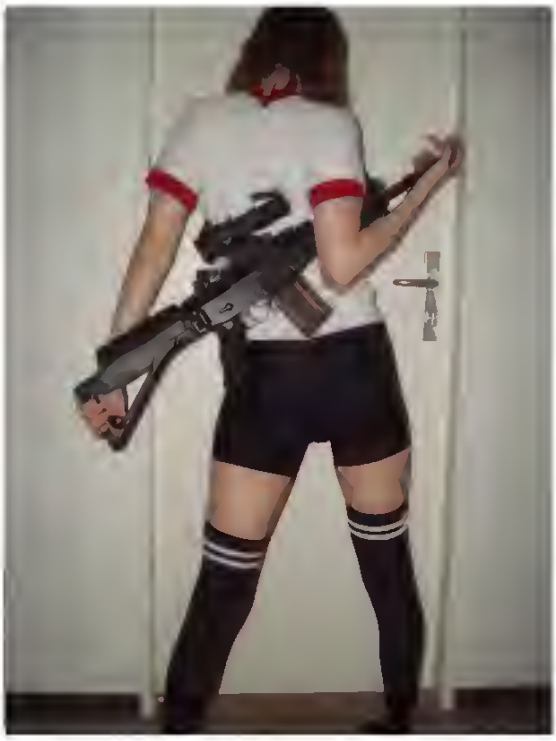
At /ak/, we stuck some translated text on a manga page, just like a bunch of other scanlating groups have done However ours is better, because we refuse to post it to any other sites than http://ak-scans.wikia.com and /a Because

Our wiki is the greatest wiki ever made It may be unorganized and have limited content, but that's your fault If you were a real operator you would love it once again look at our translator, that sig sure is cool isn't it?



Yeah, you know you want to send money to us

And by the way, check out our new website We decided that humans don't need to quickly read manga by webpages If you were a really manly teutonic operator, you wouldn't be bother by downloads plus we've tested the server to be able to take 100,000,000 requests at one time, and that was when the server was burned in a lake of molten lava, on the moon If you don't believe us, it is because you aren't a real operator

By the way, our cheap , mass-scanned manga are the best thing ever, and totally worth giving us lots of money, but not that cheap , mass-scanned, manga from other people, thats garbage not that it matters because you're not in our threads, so you will have to wait for your translations Because you suck, and we hate you, but we know you'll be back We can beat you down like a trailer park wife, but you'll come back, you always do

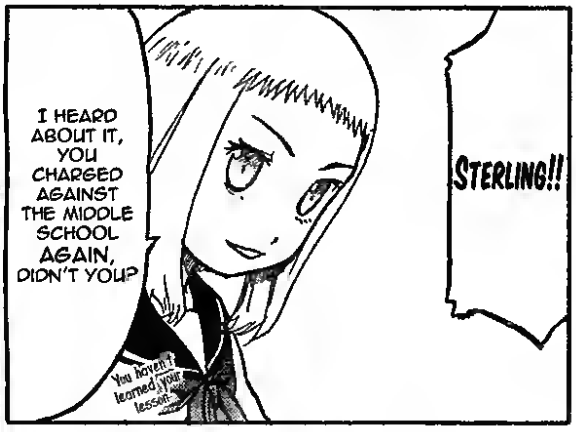
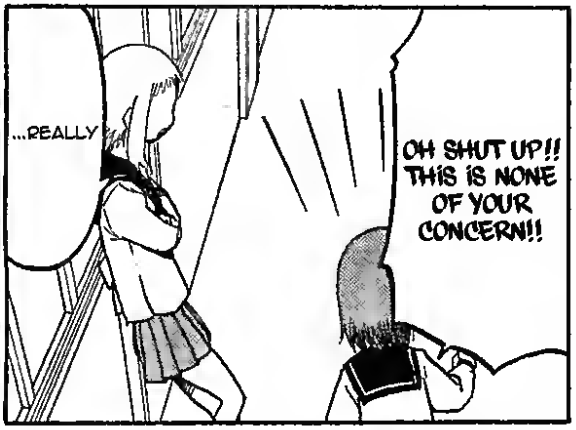
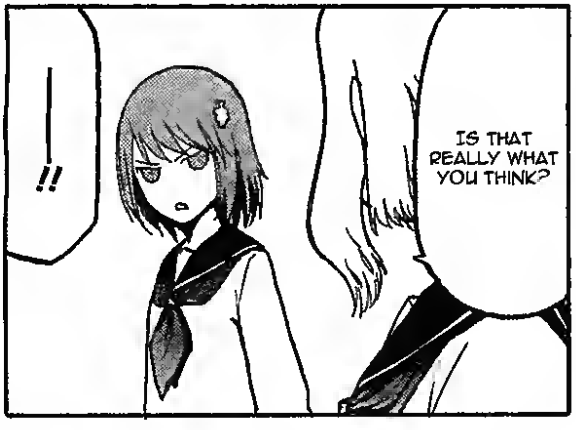
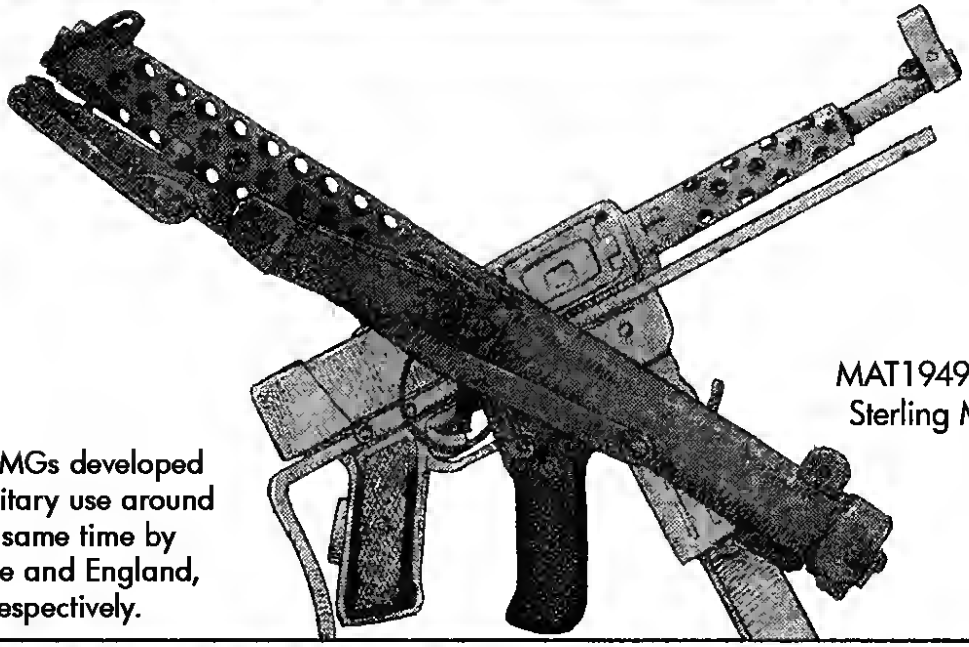
MA1949 STERLING MK4







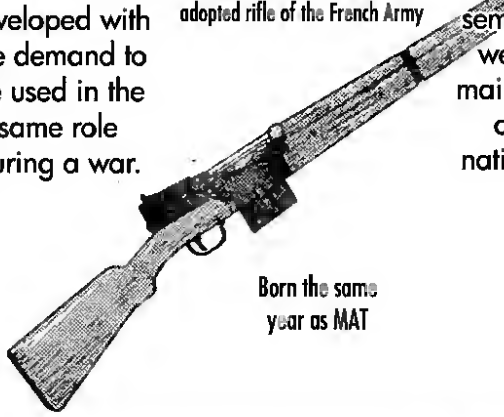


Are SMGs developed for military use around the same time by France and England, respectively.

MAT1949 and Sterling Mk4

After the war new SMGs were developed with the demand to be used in the same role during a war.

MAS Mle.1949, the officially adopted rifle of the French Army

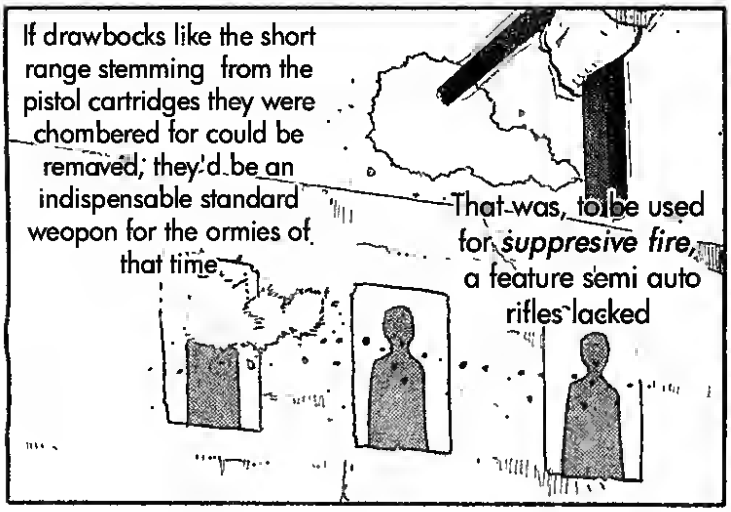


Born the same year as MAT

After the end of the war, semi auto rifles were still the main armament of various nation's armies

If drawbocks like the short range stemming from the pistol cartridges they were chombered for could be remaved, they'd be an indispensable standard weopon for the ormies of that time.

That was, to be used for *suppresive fire*, a feature semi auto rifles lacked



The SMGs introduced to the battlefield by the various nations during WW2

Were fielded in a support role for the main battle force of infantry which during that time, made use of repeating and semiautomatic rifles.

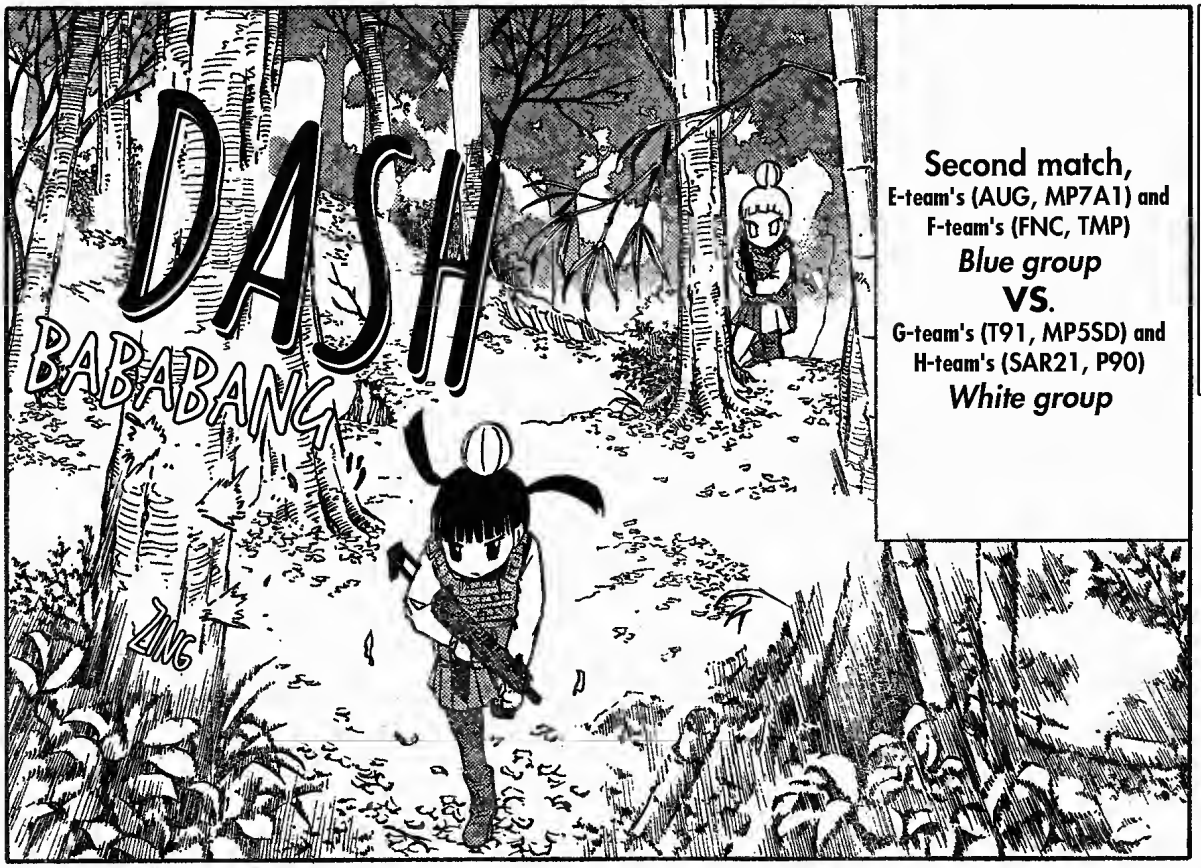
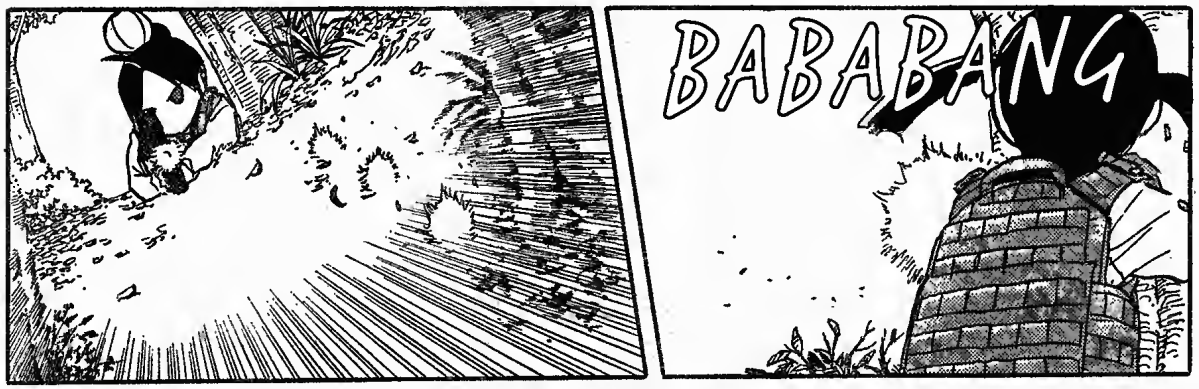
P90 vs MP7A

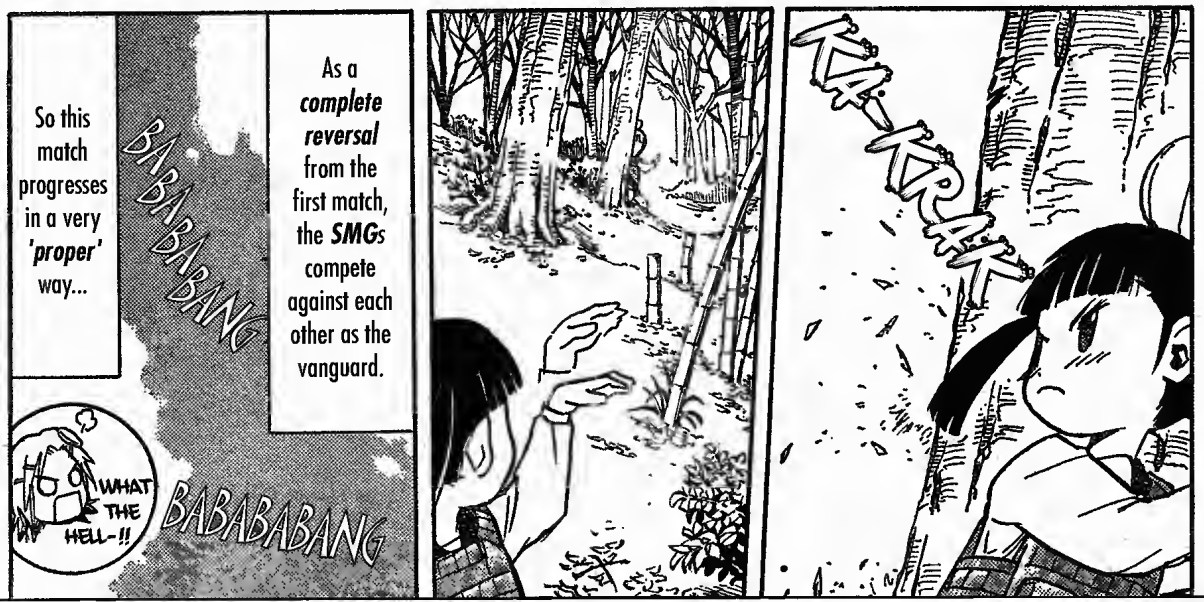
A pair closely bound by destiny (?)



Second match,
E-team's (AUG, MP7A1) and
F-team's (FNC, TMP)
Blue group
VS.
G-team's (T91, MP5SD) and
H-team's (SAR21, P90)
White group

RIGHT NOW, IN THE MIDST OF THE MOCK BATTLE, THEIR WILLPOWER AND FATE ARE INTER-TWINED!!





So this match progresses in a very ***'proper'*** way...

As a ***complete reversal*** from the first match, the ***SMGs*** compete against each other as the vanguard.

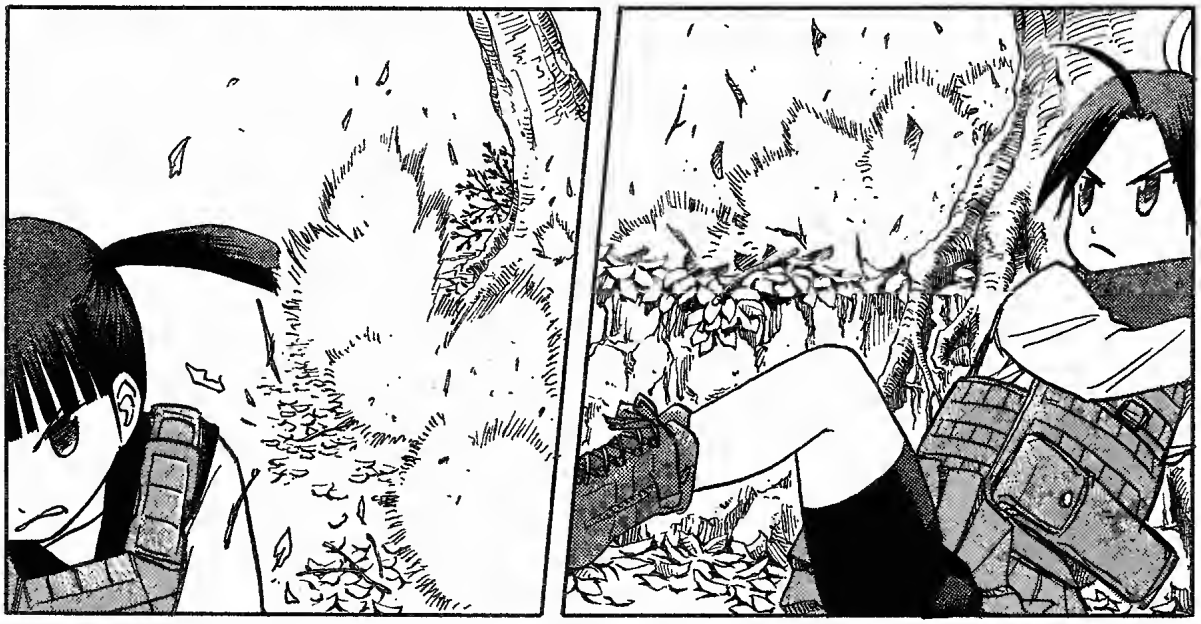
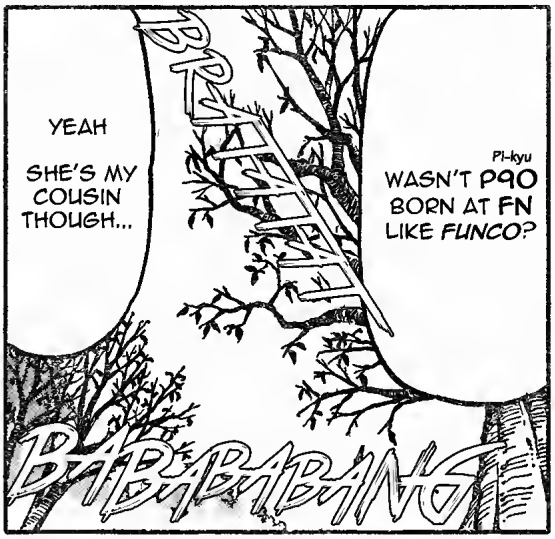
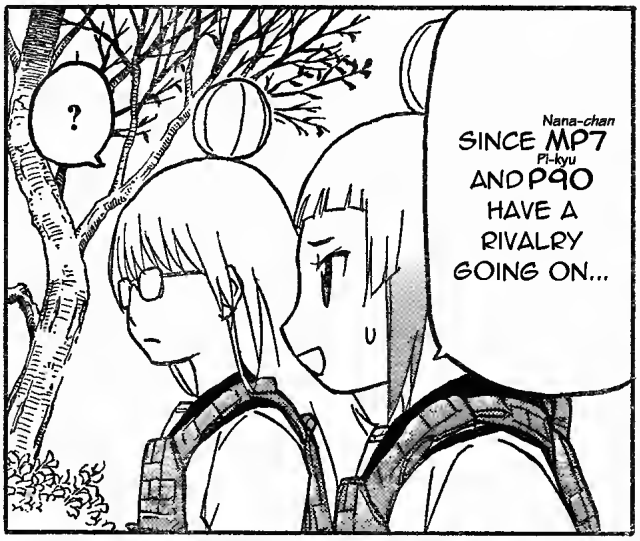
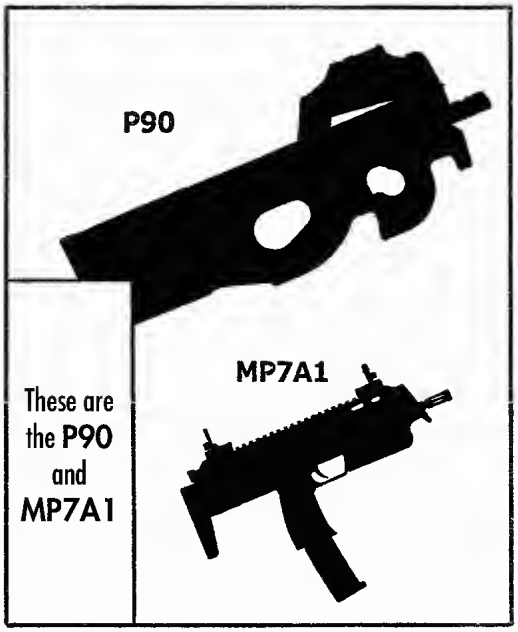
前回までのあらすじ

青錆学園にやってきた新任教師・現国はいきなり病院送りに…。それもそのはず、彼の教え子たちは突撃小銃だったのです！　遠足で横浜に来た、ふんこは人間と銃の在るべき姿を知るのだった。さて、校内では、反目し合う中等部と高等部の合同模擬戦が行われる事に。さて、結末やいかに…!?









登場人物紹介

●ふんこ●FNCな少女。みんないいようにからかわれてしまいがち。

●いちろく●大雑把な性格で、ふんこの親友。口は悪いが面倒見がいい。

●しぐ●ふんこの友達で優等生。成績も運動も万能だけどちょっと天然。

●える●もの静かで病気がち。近頃、不憫なキャラが定着してるみたい？

Class III body armour

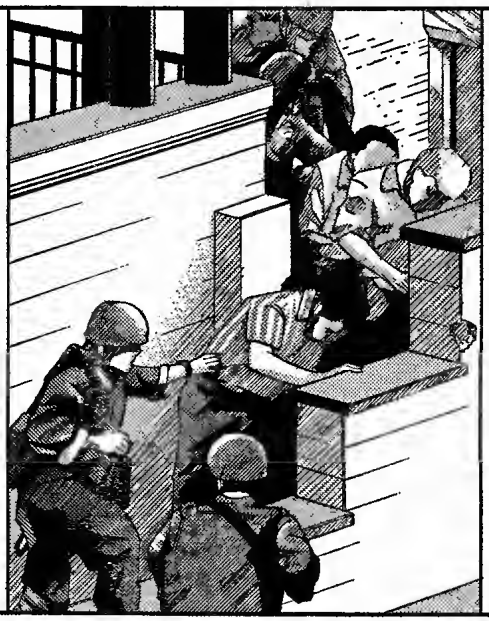
9mm *Parabellum* bullet (MP5, UZI, TMP, etc.)

5.7mm X 28 bullet (P90)

※ The 4.6x30mm bullet developed for the **MP7** has the same penetration power

Since ***law enforcement*** and ***counter terrorist*** forces have became more heavily equipped in recent years, ***PDW***s were developed as effective means of self defense against enemy combatants wearing ***body armour*** (bulletproof vests)

●あぐ●中等部の生徒会長。優等生だけど、ふんこに特別な想いを…？



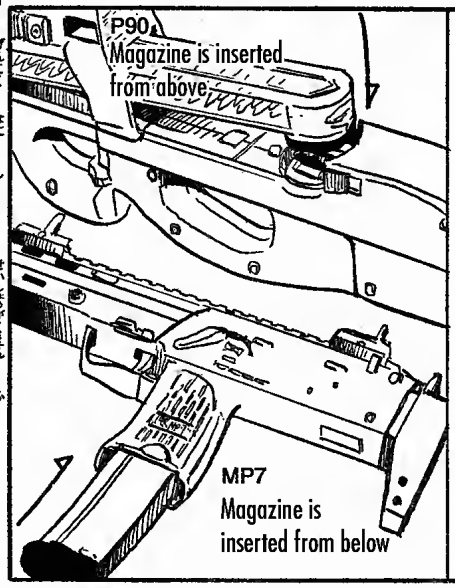
This success led to an increased adoption of it within ***Special Forces***.

FN's ***P90***, the first weapon in this category to be completed and introduced to the market, became famous *overnight* during the Japanese embassy hostage crisis in Peru.

This ammunition basically keeps the shape as that for assault rifles, just with decreased size.

They became a valuable asset, as pistol rounds were unable to match their penetration power.

●現国●何も知らずに青錆学園に赴任してきた唯一の人間。本名不明。



Even though **H&K** (*Heckler und Koch*) started development after **FN**, the ***MP7A1*** gradually started chalking up achievements, as its even more compact design and conventional approach, makes it easier to adopt and reduces the time needed to be trained on it.

ATTENTION TO THE READER

In a world of compromises, some people put watermarks on their pages.

But it doesn't matter, because our translations are the fastest ones out there. Look at how cool our translator is... if you send us money you will be that cool of an operator too. And chicks will dig you.

At /ak/, we stuck some translated text on a manga page, just like a bunch of other scanlating groups have done. However ours is better, because we refuse to post it to any other sites than [redacted] http://ak-scans.wikia.com and [redacted] /a. Because:

Our wiki is the greatest wiki ever made. It may be unorganized and have limited content, but that's your fault. If you were a real operator you would love it. once again look at our translator, that sig sure is cool isn't it?

Yeah, you know you want to send money to us.

And by the way, check out our new website. We decided that humans don't need to quickly read manga by webpages. If you were a really manly teutonic operator, you wouldn't be bother by downloads, plus we've tested the server to be able to take 100,000,000 requests at one time, and that was when the server was buried in a lake of molten lava, on the moon. If you don't believe us, it is because you aren't a real operator.

By the way, our cheap, mass-scanned manga are the best thing ever, and totally worth giving us lots of money, but not that cheap, mass-scanned, manga from other people, thats garbage. not that it matters because you're not in our threads, so you will have to wait for your translations. Because you suck, and we hate you, but we know you'll be back. We can beat you down like a trailer park wife, but you'll come back, you always do.

Give us money.

Sincerely,
